PRESS RELEASE

FOR IMMEDIATE RELEASE

Circleville Department of Public Utilities to Begin Hydrant Flushing Program

Circleville, OH - On Tuesday, September 3, 2024, the Circleville Department of Public Utilities will commence its hydrant flushing program to clean the City of Circleville's water main lines. The program will initiate in the Island Road area and progress in a northeastern direction. Upon completion of the northern portion, approximately from Hargus Creek north, the southern portion of the flushing program will begin, working in a southeastern direction.

The hydrant flushing is expected to take approximately two weeks, with operations conducted on weekdays from 8:00 a.m. to 4:00 p.m. While uncommon, residents may experience periodic water discoloration when flushing crews are in their area. It is recommended that residents check the water before use, especially before washing white clothing.

If you have questions or concerns, please contact the Utility Department at 740-477-8255, Monday through Friday, from 8:00 a.m. to 4:00 p.m. We appreciate the public's cooperation and apologize in advance for any inconvenience this may cause.

Ragene Pinson
